

Class Problem 11: Flatten List

- **Step 1:** Create a file with the following Python code

```
s = [[1, 4, 1], [3], [2, 3], []]
```

```
res = []
```

```
...
```

```
print(res) # [1, 1, 2, 3, 3, 4]
```

- **Step 2:** Fill in the blank (...) such that `res` includes all the numbers in the sublists of `s`
- **Step 3:** Sort the list `res` before printing it
- Finally, submit the file to Canvas
