Class Problem 4: Legal Drinking Age

- **Step 1**: Ask the user about his or her age.

- **Step 2**: If the age is unrealistic (<0 or >150), print an error message.

- **Step 3:** Otherwise, depending on the age (younger then 21 or older), print a message about whether the user can legally drink alcohol.

- ***Step 4 (optional):*** *Ask the user about his or her date of birth and calculate the age at the end of this year 2017*

- Finally, **submit the file to Canvas**
