# Class Problem 20: Counter Button (GUI)

- Fill in the `inc` function below such that every button click updates the label text, increasing the number by 1

```python
import tkinter as tk
window = tk.Tk()
label = tk.Label(window, text="0")
label.pack()

def inc():
    ...

button = tk.Button(window, text="+1", command=inc)
button.pack()
window.mainloop()
```

- Finally, submit the file to Canvas
